

- “Following a bad fall, and a stay in hospital for 6 weeks, I feel less vulnerable and now worry in case the council takes WristCare away from me for some reason”
Mary.
- “I’m more confident now I have WristCare, I have started going out more often, something I hadn’t been doing since I had my hip replacement”
Marjorie.
- “I would hate to be without WristCare , it gives me so much confidence”
Gladys.
- “It gives me peace of mind. Once WristCare provided early notice of a urinary infection and my doctor was able to prescribe antibiotics at a very early stage, I think I might have been hospitalised if the infection had not been picked up so early on”
Linda.
- “I have had several falls in the past and suffered a stroke recently, I feel much happier wearing WristCare all the time and know that someone will come if I need help or I can’t call for help myself”
Jean.
- “I feel confident with WristCare, it provides my care workers of any early warning of deterioration in my condition and might prevent me having to go in to hospital”
Robert.
- “I like the feeling of security WristCare gives me, I feel more able to walk around my flat with confidence. I am reassured by the community nurse being able to look at my data and see if I have had an unsettled night, she then visits me to talk through any problems and gives me advice”
Mrs W.
- “I live alone and have no family nearby, I have recently fallen several times and each time WristCare has called for immediate help. I am extremely grateful to have Wrist-Care and believe that it saved my life. It gives me confidence and makes me feel much safer”
Mr T.
- “My community nurse says that WristCare is like having a crystal ball, she can see if my health starts to deteriorate, she then visits me to see how I am and sorts out any problems quickly before they get worse”
Mrs J.
- “WristCare is a godsend, I wear it all the time and it doesn’t get in the way. It’s very reassuring to know there is someone there keeping an eye on me if I need help”
Sheila.
