

WristCare Needs Assessment System

Client Profile:

A person who is in need of a Social Services assessment in order to ensure the correct level of care package is commissioned.

Key features:

- ✓ Manual alarm
- ✓ Non-Compliance alarm
- ✓ Deterioration alarm
- ✓ Lifestyle monitoring

Social Services benefits:

As soon as an assessment is deemed necessary there is an acceptance of responsibility by health or social services. Taking all the necessary precautions to avert any crisis in this interim period is crucial.

The WristCare package provides an assessor with a tool to objectively assess the client. Wellness data can be used to endorse, or contradict, the statements and claim of the client and their family.

The rapid and simple installation of the WristCare system supports the central government 4 week assessment target. It also provides a temporary access to a telecare response service, this reduces the culpability from a delayed assessment as well as providing a rapid response in the event of a crisis.

Code	Description
7003	WristCare Needs Assessment System
7004	WristCare Wandering System including Wellness monitoring

Vivatec has been selected as a supply partner to the NHS Purchasing and Supply Agency (NHS PASA) for Telecare products and services.
